

WE'RE HIRING!

PRODUCT MANAGER

LOCATION: South Delhi, India

EXPERIENCE: 2-6 Years

KEY RESPONSIBILITIES-

- Plan, strategise, and execute the development of a Fintech product and define the vision for the growth of the same.
- Identify and analyse areas of opportunity to diversify the product and its applicability.
- Ideate, brainstorm, and collaborate with the tech team to create more innovative sub-products related to digital escrow.
- Develop and communicate comprehensive documents outlining the product developments and suggestions to the tech team, operations team, and business development team.
- Manage and execute entire components of large projects from scratch, including problem-solving, data gathering, deriving insights for creating a robust product, communicating suggestions for improvements effectively.

OUTLINE OF THE IDEAL CANDIDATE-

- Good technical knowledge, exposure to API-based integrations. Having managed user experience for Web or App-based digital products.
- Proven analytical and quantitative skills.
- Proven record of leading project planning, strategising, execution and delivery.
- Experience working with engineering teams to define the product requirements.
- Works well with cross-functional teams; overcomes obstacles by collaborating with others in the team.
- Bachelors in Engineering and/or MBA preferred.
- Most importantly, the passion to work in a startup. It only gets better if the person can sync with the team, take on their responsibilities and give the best output. It's a small team with a flat hierarchy, everyone grows with the company.
