

# Castler Job Posts

**Location:** Delhi

## 1. Head of Product

### Responsibilities:

- Own & Drive the end-to-end product strategy and growth for one or more top verticals at Castler.
- Own & Drive the user experience on Android, iOS, and WEB for these verticals. Understand the user's needs (both spoken & tacit) and identify current gaps in the system.
- Ship products with Engineering and Design based on the agile framework.
- If needed, interface with external partners/aggregators/government bodies/financial institutions in order to get clarity on the path forward & deliver within aggressive deadlines.
- Evaluate the impact of your changes by analysing data & sharing insights with the broader team
- "Eat your own dog food" meaning, you should be a power user of your product & know it better than anyone else in the company.
- Help the Business team define clear & differentiated value propositions that they can offer to customers/merchants/aggregators etc. in the market

### Qualifications:

- BTech./BE/M.Tech in Computer Science or equivalent and/or MBA
- Minimum 9+ years of experience in product management and technology experience
- Previous Product Management experience in the payment gateway
- Previous programming experience is a double plus

### Key Competencies:

- Has the capability to drive projects to fruition; no matter how complex or ambiguous the environment is.
- Thrives in a cross-functional and fast-paced, startup environment. Is not afraid of rolling up their sleeves and getting their hands dirty with minute details.
- Sweats the small things - font types, alignment, UI, UX, etc - you get our drift!
- Excellent problem-solving, organizational, and analytical skills, with the ability to evolve product strategy based on customer research, data, and industry trends.
- Stays on top of what is happening in the industry & moulds the product to make it future proof
- Articulate communication skills
